Porcelain pieces antibacteria and non-slip for pool.
The safest option in the new era Post-Covid

A pool at home is a space to disconnect that foments family relationships. It is a private refuge free from crowds. It is the best place to face the hot summers and to add value to your home. When we decide to install a pool in our garden or terrace, or remodel our existing one, we have to consider a number a few factors such as the security and hygienic have to be present without losing focus to the design. Floors and special pieces have to be non-slip, abrasion resistance, frost proved, antibacterial and durable.

Tech Tucson Grey 30x90 · Borde Piscina Tucson Grey 30x36/4

1. Pools with extruded porcelain pieces

Now a days, we are increasing precautions in our surrounding due to worries of contagious and the virus expansion. There is no doubt that the **extruded porcelain** is the safest option to use inside and around our pools due to its technical features.

- **Non-slip surface:** Natucer's extruded porcelain finish offers a **R11 non-slip** (pass DCOV) with smooth finish. It is the value required in barefoot in pools and terraces near the water.
- **Antibacterial:** Extruded porcelain low porosity prevents that bacteria and other microorganisms to adhere to the surface.
- **Resistance:** Extruded porcelain has a low water absorption that gives the tiles physical properties to resist frost and other thermal shocks.
- **Easy to clean and maintain:** The smooth finish on the outdoors extruded porcelain makes the material stain resistance and easy to clean.

Desbordante Stanley Park Antislip 30x30/2,2 · Esq. Int. Desbordante Stanley Park Antislip 30x30x41,5/2,2

- **Special pieces:** The production process of the extruded porcelain tiles allows to design and produce special pieces for pools in 3 dimensions in **one piece**. Edges, steps, overflowing pieces, angles, etc are a complete constructive solution. It is a aesthetic and hygienic solution that helps to create perfect rounded finishes easy to clean and safe.

2. Overflowing pools that brings you joy

Pools used to be a isolated spaces in the houses where to refresh in summers, now, they become a decorative space to joy and disconnect from our current problems. The new post-Covid pools are integrated with its surrounding. Infinity lines and smoother limits fusion with the water.

This are the overflowing pools, a fusion between the floor and the water that achieves a visual effect the limitless expansion. In this type of pools, the water overflows on top of the limit boards creating a lagoon effect.

In order to achieve this type of effect, we have to install a gutter around the pool covered by a grating.

2. 1. Pools more hygienic

The overflowing system helps to maintain the water always clean, transparent and impurity free, as it is in constant renovation, thanks to the canalization system through the grating. This type of pools is more **hygienic and safe**, this is the reason why we usually find it in hotels and public spaces. In addition to have constant overflow, any noise is absorbed helping to have a silence space.

2. 2. Water movement to get more dynamism

Waterfall installation in a pool is a element that out-stand in the common pool design. Pool's waterfall have also benefits for the health that it becomes not only a esthetic. Its sounds invite you to relaxation, helps to relieve stress and improve the sleep. Waterfall helps the muscles to relax.

3. Pool edge, a clean and safe solution

From now on, pool is becoming a very special area of our homes and choose the best material is important. When we are designing our pool is important to have in consideration, not only the flooring around it, also it draining. It will depend on the type choosen (overflow or skimmer). Edges not only provide visual effect, also they have to guarantee security and hygienic in the pool. In addition, one of the side has a little inverse slope to keep the pool cleaner. In these Skimmer or traditional pools, the water is approx 20cm (8") below the boarder. At this height you find the openings (skimmers) that filter the water and make sure cleaning itself.

4. Pools non-slip with 120cm (48") Step

For the pools with traditional system or Skimmer we introduce the 120cm (48") angular step (90°) in one piece as a solution of the surroundings. It is the perfect piece for wet areas that needs a high level of **non-slip rating (R11 / DIN 51097: CLASE C / DCOV)**. Always thinking and producing to guarantee the maximum security around the pool and on the steps to access it. The extrusion production system provides to the steps to a high mechanical impact resistance, abrasion and freeze proof. In addition, its large size helps to the installation and brings a minimal look to the pool with clean and modern lines.

4. 1. An infinity solution

The "infinity pools" are able to transform the space and join the water and the horizon making spaces more peaceful and invites us to relax and rest. They bring a sophisticated and more actual look. The water in these pools falls from one or more of the pools sides.

In order to solve the slope we used the collection Pool Porc. in 10x10cm (4"x4"), and its variety of special pieces making possible to finish all the corners with a perfect finish. The color turquoise blue helps to merge with the sky.

4. 2. Minipools trend

During this lock-down time we appreciated every single meter of our home. A small terrace is not anymore an obstacle to enjoy of a pool. It is just a matter of well planing with the surrounding space. A perfect example are some of our project done with the design that integrates in the design of every home.

For this type of project is very important to choose the right materials and special piece that allow us to solve any structural or construction problem.

In this particular case, we used the **angular step** for the pool access stairs and "vierteaguas piece". A perfect special pieces that adapt to this kind of pool structure. The final outcome is a minipool fully integrated with the rest of the flooring. A great place to enjoy and relax.

Revestimiento Piscina: Pool Porc. Iron 10x10

In order to design XS pools we have to keep in mind the security. Although it is a small space we always have to use non-slip flooring to prevent accidents. For the design of this pool we used a **120cm (48") angular step in Antislip R11 finish**, in the step and surroundings. These large size pieces are a great option to make this pool bigger. We reduce the number of joints and create a endless feeling, helped by the mirror installed by the end of the pool. It is an option to gain more space without having it.

Revestimiento Piscina: Pool Porc. Negro 10x10

The main goal of this minipools is not to swim, we are looking for pools deep enough to stand, children to play without worry or just a space to sit down, relax and refresh. For that reason, we have to have in mind the inside of the pool. We are looking into design, functionality, durability and security. For this pool we used the **Pool collection in porcelain**, a shade controlled variation and resistant that have a great number of special pieces and trims to finish all the edges such as **benches, stairs, solarium, etc.** We can enjoy the quietness of this little wellness space.

5. Pool, pool-beach and terrace in an integrated style

After Covid difficult times, people needed to go out and enjoy outdoors. Joining the house with the terrace became the most important, and why not with the swimming pool. This is way our main goal is to join in the same style the pool, beach and terraces. Same colours, same ceramics, giving special attention to the colours inside the pool. Limits disappear and all the surroundings become an unique visual set. Is really important to choose the right floor, that allow you to create this ambient, with the proper features, in wet and dry areas, always using extruded porcelain.

Extruded Porcelain tile has the best features thanks to its perfect production process and the use of high quality raw materials. Antislip, resistant to weather changes, hygienic, antibacterial and showing a clear easy maintainance.

6. Extruded porcelain, also inside the pool

Nowadays pool design is completely different, we try to integrate all elements as a unique ambient, using the same floors in terrace, pool beach, crowning system in the border, and also inside the pool. In this way we will get a complete aesthetic continuity. Same style, same colour, same resistant materials, **antislip and hygienic**.

6. 1. Endless designs

The swimming pool design has no limits, only the imagination of the designer will put the limits. Any depth, shape or space will be possible, we can build our dreamed pool. These are some ideas and real examples of pools full of creation and design, where special pieces and finishes played the most important role.

We know how trendy is the continuity of the terrace to the pool, but in this case is the interior itself of the pool which is extended to the exterior arriving to the pool-beach the same colours, giving strenght to the Turchese finest colour, graciously destonified, in size 10x10 (4"x4"). **(SERIE POOL PORC.)**

6. 2. Touch of colour in the pool

POOL SERIES in extruded porcelain is the best option against the glass Mosaic. Its technical features adapt to all the extreme weather changes, unchanged aesthetically. The perfect material for the floor, strong, resistant and beautiful. Ideal material for a dash of colour inside our pool, always slightly destonified.

- Our white, light and grey colours are luminous during the day, and show a nice contract during nights. A nice clear sky blue is reflected on water.

Pool Porc. Luz 10x10

Pool Porc. Cloud 10x10

Pool Porc. Iron 10x10

Pool Porc. Emerald 10x10

Pool Porc. Indigo 10x10

- Blue colours are reflected and help us relaxing, intensifying the colour of the sky.

Pool Porc. Rojo 10x10

Pool Porc. Negro 10x10

- Red colour is a risky bet but also very modern and innovative.
- Black colour attracts heat, and reflected in water gets a special water mirror effect.

7. Decor Steps to combine with any floor

Steps today are much more than a simple building element, and **VERSA-TILE 120 cm steps** are unique in its **extruded porcelain** quality. Its decorated designs combine with any collection and any style, being so creative in expert hands of designers and architects, also being Mixed together to other materials such as natural wood, stone, concrete, ... in order to create the most original and personal stair.
